| IDUB Programme and Project description | The project is a part of the IDUB I.3.4 Action “Creation of three research teams that will initiate development of scientific networks conducting studies in the area of civilization diseases, emerging pollutants and circular economy”. The competition winner will have to create a new, interdisciplinary research team. The team will be obliged to carry out a project - proposed by the winner of the competition and accepted by the University of Warsaw – with breakthrough research in the area of “Emerging biological hazards in view of the globalization and changing socio-economic factors, and development of bioremediation techniques for...
polluted environment”.

Detailed research objectives (the project should be related to at least one of them):

● identifying factors affecting the profile of biological hazards (e.g. environmental pollution, decreased biodiversity, climate change, food crisis, multi-drug resistance of pathogens) in various climatic zones and regions with various anthropopressure
● specifying the role of global human mobility in the transfer of pollutants and expansion of other biological hazards;
● developing systems for monitoring and removing pollution, and counteracting other biological hazards.

The competition winner is expected to obtain external funding for conducted research and to establish cooperation with leading scientific centres, which are conducting studies in similar areas. The winner of the competition is also expected to cooperate with research teams operating within the University of Warsaw.

Job description and responsibilities

● Conducting scientific research, in accordance with the research area of the competition and the application submitted.
● Taking active measures to raise external funding, in order to finance the team’s activities after the completion of the funding period from the Excellence Initiative (IDUB) programme.
● Taking initiative to establish cooperation with other leading research groups in the topics represented by the research team.
● Organising the work of the research team, supervision of the team members – in particular students and doctoral candidates who are participating in the team research.
● Active participation in functioning of the University of Warsaw, including the organisational unit hosting the research team, and taking active measures aimed at establishing cooperation with other research groups within the University of Warsaw.

Key requirements

Only candidates that fulfil conditions defined in Art. 113 of The Act of 20 July 2020 – The Law on Higher Education and Science (Dz.U.2020 r. no. 85 with amendments)¹

Other requirements:

● A doctorate in biological, chemical or related sciences, and

at least two years of postdoctoral research experience.

- Distinguished academic achievements, related to the
  research area defined in the competition, and confirmed by
  publications (in the case of applied research, by patents
  and/or implementations).
- Original research idea for the new team, in accordance
  with the research area defined in the competition.
- Experience in team management, student supervision, and
  the ability to establish cooperation.
- International experience.

We invite to apply especially persons who are not employed at
the University of Warsaw.

### Application

An application in English describing, among other things,
professional experience of the candidate and a proposed
research project to be carried out at the University of Warsaw,
for which the candidate will form a new research team to
conduct ground-breaking and interdisciplinary research in the
research area “Emerging biological hazards in view of the
globalization and changing socio-economic factors, and
development of bioremediation techniques for polluted
environment”. (The application form is available at IDUB
webpage.)

The proposal also includes a short description of the costs
planned as a part of the start-up package. The expenses must
comply with the cost regulations (available at IDUB webpage).

The application must include the following:

1. A maximum of five publications from the last 10 years,
   which document the candidate’s most important
   achievements.
2. A reference letter from the last direct supervisor
   (compulsory for candidates who will be creating their first
   research team after completing their postdoctoral training),
   and contact details (with e-mail addresses) of three
   academic researchers who can provide information about
   the candidate (compulsory for all candidates).
3. A signed statement (a scan), in which the candidate
   confirms having read and accepted the regulations for
   conducting competitions, as set out in Ordinance No 106 of
   the Rector of the University of Warsaw, from 27 September
   2019, defining procedures for conducting a competition for

<tr>
<th>What we offer</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Affiliation in one of three units of the <strong>Faculty of Biology, University of Warsaw</strong>, the leading Polish university (contact in the Faculty: Prof. Piotr Bębas, <a href="mailto:piotrbe@biol.uw.edu.pl">piotrbe@biol.uw.edu.pl</a>):</td>
</tr>
<tr>
<td>o <strong>Institute of Microbiology</strong> - the Institute is particularly interested in the research on emerging microbiological hazards in the context of ONE Health, modelling and biostatistics in environmental and microbiological research, creation and development of novel bioinformatics tools for monitoring, analysis and modelling of biological hazards (antibiotic resistance genes, pathogenic bacteria, viruses), monitoring and control of microbiological activity in industrial areas and waste dumping sites (contact: Dr Łukasz Dziewit, <a href="mailto:ldziewit@biol.uw.edu.pl">ldziewit@biol.uw.edu.pl</a>);</td>
</tr>
<tr>
<td>o <strong>Institute of Evolutionary Biology</strong> - the Institute is particularly interested in the research on biological diversity in the context of anthropogenic changes in the environment and climate warming (contact: Dr Rafał Milanowski, <a href="mailto:milan@biol.uw.edu.pl">milan@biol.uw.edu.pl</a>);</td>
</tr>
<tr>
<td>o <strong>Botanical Garden of the University of Warsaw</strong> - the unit is particularly interested in the research on the mutualistic relationships of plants, animals and microorganisms in the context of biological invasions, climate change and increasing anthropopressure (contact: Prof. Marcin Zych, <a href="mailto:mzych@biol.uw.edu.pl">mzych@biol.uw.edu.pl</a>).</td>
</tr>
<tr>
<td>• Work in a dynamic research community;</td>
</tr>
<tr>
<td>• Access to hi-tech research equipment - the Faculty provides an access to core facilities for confocal and electron microscopy, liquid chromatography and mass spectrometry, flow cytometry, and an animal facility allowing for maintenance of laboratory rodents in the SPF (Specified Pathogen Free) purity class. The list of core facilities is available at: <a href="https://www.biol.uw.edu.pl/uslugi/">https://www.biol.uw.edu.pl/uslugi/</a>. Additionally, each of the units has its own research equipment (details available by e-mail);</td>
</tr>
<tr>
<td>• Assistance in the relocation process; administrative assistance.</td>

<tr>
<th>How to apply</th>
<th>Please send an e-mail to: <a href="mailto:recruitment_i.3.4@uw.edu.pl">recruitment_i.3.4@uw.edu.pl</a> with the subject line: “UW/IDUB/2021/10”</th>
</tr>
</thead>
</table>
| Selection and recruitment procedure | The competition consists of two stages:  
  • In the first stage, the Selection Committee will assess the applications submitted by candidates: check their completeness, and, if the formal requirements are met, the project proposal merits and the candidate’s scientific record.  
  • In the second stage, candidates selected in the first stage will be invited to an interview in English to assess their suitability for conducting research under Action I.3.4 and leading a research team, as well as the candidate’s research and grant plans for the next 3 years. The interviews are scheduled for mid-July 2021.  

The competition is the first stage of the recruitment procedure for an assistant professor post as specified in the Statute of the University of Warsaw, and its positive outcome is the basis for further proceedings.  

The University of Warsaw reserves the right to cancel the competition without stating the reason.  

| Questions | Please, direct your questions to Dr Anna Ajduk, e-mail address: aajduk@biol.uw.edu.pl  
Detailed competition regulations are available at https://inicjatywadoskonalosci.uw.edu.pl/en/actions/i-3-4/ |
